

VEGA Network

Mission Statement and Vision

AIIC's outreach & mentoring network

Mission

The VEGA Network offers guidance on best practices to final-year students of conference interpreting, recent graduates and experienced colleagues, whether professionally trained or self-taught. VEGA further provides mentoring to colleagues who are in the process of joining AIIC. Through outreach events and workshops, VEGA aims to create greater awareness of common practical and ethical issues faced by conference interpreters, to offer solutions, and to introduce conference interpreters across the globe to AIIC and its work.

Vision

The VEGA Network strives to contribute to the future of the conference interpreting profession and the Association by providing guidance and support, while encouraging all conference interpreters to adopt ethical working practices.
