4 p.m. Break
4.30 p.m. Reporting back of groups
4.30 p.m. General discussion
5 p.m. Recommendations & conclusions
6 p.m. End

At the beginning of this year AIIC published the [report on the Workload Study](https://aiic.net/p/891), which investigated the interaction between four parameters: psychological, physiological, physical and performance and how they affected interpreter well-being and performance. The results were presented at the [Private Market Sector meeting in Montevideo](https://aiic.net/p/891) (January 2002) and a summary of the results was published in *Communicate* as well as in the [Spring 2002 edition of the Bulletin](https://aiic.net/p/891). The [full study](https://aiic.net/p/891) is available on the AIIC website and a [shortened version](https://aiic.net/p/891) (25 pages) has been sent to our main employers and all the organisations that allowed us to conduct the study at their meetings.

We are now in the follow-up stage, during which we hope to involve as many AIIC regions and individual members as possible. What better opportunity that the Porto Assembly?
